# ROTARY LOBE PUMP

Rotary lobe pumps are useful for all high viscous products. It has an SS-316 pumping chamber and tri lobe design. Applicable for food, pharma, paint & sewage industries.

## About Pump

### Features

- Compact size
- Easy maintenance
- Handling low as well as high viscous liquid
- High efficiency
- Hygienic design
- Inter changeable rotor
- Ideal for delicate media & where organic solid suspended particle in liquid
- Reversible operation
- Robust construction

### M.O.C

- SS316

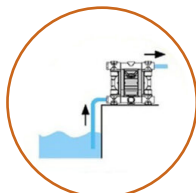

### Specifications

- Low NPSHr
- Maximum Flow Rate 36 M.Cu/Hr
- Maximum Discharge Head or Pressure 7 Kg / Cm.Sq
- Maximum Temperature 200 Deg C

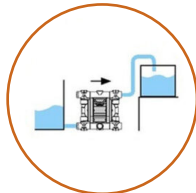

### Applications

- Chemical Industries
- Dairy Industries
- Delicate Media
- Food Industries
- High Viscous Liquid
- Petrochemical Industries
- Pharmaceutical Industries

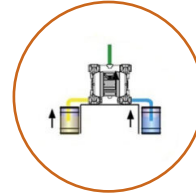

## Installations

Self Priming

Positive Suction Head

Twin Suction Manifold
