THERMOPLASTIC MAGNETIC DRIVE PUMP

These pumps are 100% leak proof and ideally suitable for handling corrosive chemicals, toxic and fuming liquids, acids, electroplating chemicals, dyes, solvents, petrol, kerosene, pharmaceutical and food syrups etc. There is no shaft seal used and the impeller is provided the rotation with the help of magnetic drive. High power permanent rare earth magnets are used in magnetic drive arrangement which gives high mechanical efficiency with zero slippage.

About Pump

Features

- Flow Rate: 600 LPM
- Head : 32 mwc
- Temperature: 100 degree C

Specifications

- These pumps are 100% leak proof magnetic drive pumps. There is no shaft seal used and the impeller is provided the rotation with the help of magnetic drive. High Power permanent rare earth magnets are used in magnetic drive arrangement which gives high mechanical efficiency with zero slippage.

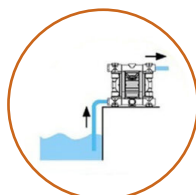

M.O.C

- GFPP
- PVDF

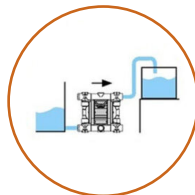

Applications

- | | |
|-----------------------------------|---------------------------------|
| ● Acid Regeneration Plants | ● Food Industries |
| ● Alkalies & Caustic Soda Plants | ● Hydral & Atomic Power Station |
| ● Chemical Industries | ● Paint Industries |
| ● Chloro Alkali Industries | ● Pharma Industries |
| ● Dyes & Intermediates Industries | ● Picture Tube Industries |
| ● Effluent Treatment Plants | ● Power Generation Plants |
| ● Electronic Industries | ● Pulp & Paper Industries |
| ● Electroplating Industries | ● Steel Re-rolling Plants |
